Comments :

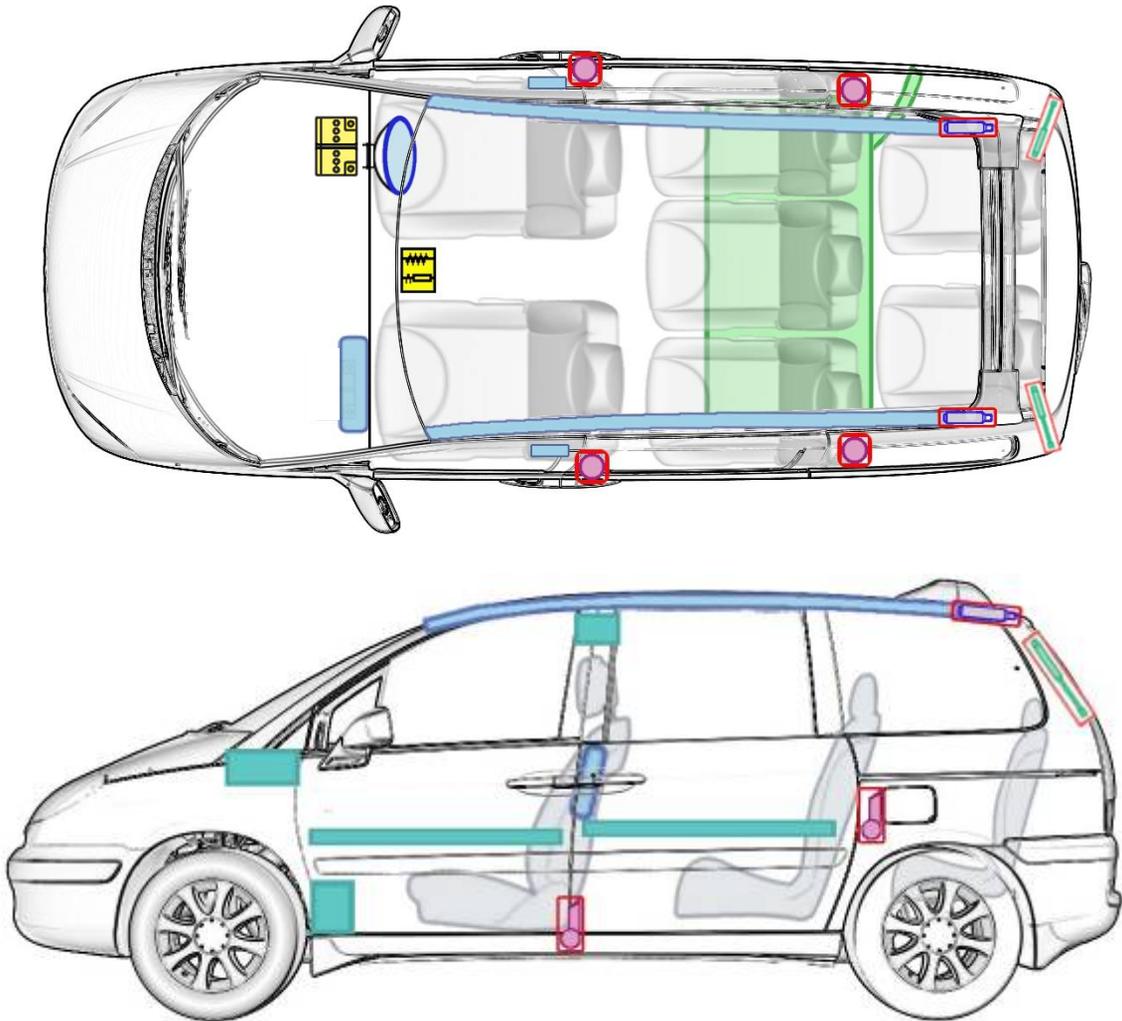

- Battery in the boot, on the rear left-hand side behind a flap. There is a relay in the front unit, where the battery is usually located
- Aluminium front and rear doors
- Active bonnet: low pyrotechnic loads only used for releasing a spring held compressed
- Seats:
 - ✓ Electric controls for the front seats inside the door (on the arm rest)
 - ✓ 3-seater or 2-seater individual side rear bench seat + 1 additional centre seat
- Pyrotechnic lap belt return on the front passenger side (located on the seat runner)
